

CANCER...
Prevent it or fight it!
YOU have the choice.

ELLAGIC ACID

We are pleased to bring you the breakthrough of the century
in the search for the prevention of cancer.

Why Ellagic Pet Protect™

Dr. Daniel Nixon, president of the American Health Foundation and his colleagues have studied Ellagic Acid since 1993 at MUSC (Medical University, South Carolina). *

Recently published results show:

- Ellagic Acid caused growth cycle (G1) arrest of cancer cells, thus inhibiting cell division (mitosis).
- Ellagic Acid from the Meeker raspberry prevents destruction of the regulatory gene, (P1) cellular proliferation. P1 is regarded as the safeguard of normal cellular division proliferation.
- Ellagic Acid will not allow cancer cells to destroy the P53 gene, which safeguards cells from turning cancerous.

Published Results Show Similar Results in The Following...

- Mammary Cancer
- Prostate Cancer
- Pancreatic Cancer
- Skin Cancer
- Colon Cancer

Added Benefits of ALL Natural Ellagic Pet Protect™ may include...

- Antiviral
- Antibacterial
