

# Fastrack Probiotic

## Energize your dog!

**Fastrack Probiotic** direct-fed microbial products supply live lactic acid-producing bacteria, yeast and B-vitamins to supplement your dog's diet.

### **Proud owners report that providing Fastrack to their dogs results in:**

- Higher energy levels
- Enhanced appetite
- Improved hair coat
- Increased performance and endurance

### **Fastrack direct-fed microbials - the natural way!**

The appearance and performance of your dog is dependent upon the proper balance of bacteria in the digestive tract. Birth, weaning, transporting, food or management changes, environmental conditions, heavy workout training and antibiotic therapy can upset the balance of health-promoting bacteria in the digestive tract. The unique combinations of natural lactic-acid producing bacteria, yeast, enzymes and vitamins in Fastrack probiotic products help to ensure a healthy digestive track.

### **Three Fastrack Products for convenient use:**

- **Liquid dispersible**  
For daily supplementation- dry powder form featuring a high concentration of lactic acid-producing bacteria, yeast and enzymes. (for dogs)
- **Canine gel**  
A concentrated gel for use during periods of irregular nutrient intake such as birth, weaning, transporting, food or management changes, environmental changes and antibiotic therapy.

The gel form provides lactic acid-producing bacteria, yeast, enzymes and vitamins. Dogs under 50 lbs. receive 2cc and dogs weighing more than 50 lbs. receive 4cc.

- **Canine Microbial Supplement - FOS Fortified**  
Same bacteria as liquid dispersible with 50% Fructooligosaccharides (FOS).
